At this time, we plan to conduct meetings with the video conferencing app ZOOM. This app is free of charge, and can be accessed via smartphone, tablet, or desktop. Instructions for downloading ZOOM are listed below. This must be downloaded PRIOR to a meeting, so our suggestion is that you go ahead and set up your account today so that you will be ready when your meeting time comes. Please use your @go.olemiss.edu email address as this will be where we send the meeting links to.

ZOOM requires you have your email open and accessible so that a unique link to your meeting can be sent at the time of your appointment. While ZOOM is a video conferencing app, a webcam is not necessary, but audio capability is required. Once you receive your link, you should be prompted to join the meeting.

If you are not able to access the internet, or have issues with connection, please let Erin (emridout@olemiss.edu) or Hillary (hhudson@olemiss.edu) know so that we can find alternate options for you.

**For Laptop/Desktop access:**
https://zoom.us/signup is the link for laptop/desktop access. From this link, you can proceed with the registration process.

Once you join the meeting, be sure your audio/video capabilities are enabled (bottom left of video screen will have a tool menu – click the microphone icon for audio options).

**For Smartphone access (iOS or android)**

Search “ZOOM” in the app store and look for the app below. Once downloaded, you will be prompted to create and account.

Once you join the meeting, be sure your audio/video capabilities are enabled. If you swipe right, a button that says “tap to speak” will allow audio to connect. Then swipe left to return to the video.
